System Administrator with 6 years of experience. Adept to resolving complex networking issues and demonstrating strong knowledge in fields of Linux administration, Virtualization, Cloud computing and Automation in fast-paced environment.

EXPERIENCE

ATOS INDIA PVT. LTD. | AWS ADMINISTRATOR & CLOUD TECH LEAD

Nov 2016 – Present | Pune, MH, India

- Setting up infrastructure for POC projects such as Apprenda, OpenShift, Platespin, Racemi, AWS Import/Export in AWS.
- Leading in planning migration strategies for 1000+ Windows and Linux servers from client's on-premise infrastructure to AWS.
- Troubleshooting network and infrastructure issues pertaining to AWS cloud in development and production environments.
- Finding innovative ways to automate daily tasks in cloud using Python and BASH scripts.
- Managing users, resources, services and billing for POC projects in AWS.
- Leading AWS Competency program to mentor new recruits about AWS Cloud.

TRANSPERFECT | SYSTEM ADMINISTRATOR

Jul 2011 - Sep 2016 | Corvallis, OR, USA

- Helping in localizing and maintaining 200+ websites for Fortune 500 and multinational clients using UNIX based proxy software.
- Storing, querying and backing up web crawled data from client websites in MySQL database and generating files for the linguists to translate.
- Automating daily recurring software updates and cache backups using BASH/Python scripts and CRON jobs.
- Contributing to global team of 12 members by investigating network and outage related issues for 6 production data-centers and AWS EC2 instances consisting of 250+ load balanced servers spread across the globe.
- Training new hires, assisting the manager in claiming/delegating daily tasks within the team and documenting the company processes in Confluence to help improve the software.

CERTIFICATIONS

Aug 2016 AWS Certified Solutions Architect - Associate
 Jun 2017 AWS Certified Developer - Associate

PERSONAL PROJECTS

- Designed highly available and scalable Wordpress Blog in AWS Cloud using services such as AutoScaling, EC2, ECS, ELB, Lambda, Route53, S3 and VPC. [<http://cloudblog.akolkarsohan.com/blog/>]
- Implemented serverless website using S3, Lambda and API Gateway.
